(54) BOWLING ALLEY MANAGEMENT SYSTEM AND CONSOLE FOR BOWLING

(57)Abstract:

PROBLEM TO BE SOLVED: To enable to provide a new service to a customer (bowler), by composing a console so as to enable to prepare a print of image synthesized with the face and the upper half body of the bowler and the frame image by operating the console during a bowling game.

SOLUTION: A console for bowling to detect the state of pins set at positions after bowling a bowl and the display the bowling score counted by the state of pins after bowling a bowl is equipped on each lane to transmit data with a host computer to each other through a local area network. A video camera 95 to take an image in front is equipped and a means to synthesize an image obtained by taking the image by the video camera 95 with another image (a frame image, a message, etc., selectable by cursor key operation) is equipped on the console (or the host computer). A print means to print the synthesized image is equipped on the host computer.
